

IN THE ABSTRACT

Please amend the Abstract on page 1, lines 1-9, as follows,

--

~~{ABSTRACT}~~

~~A method and a system for outputting an image having a specific color on an output device, the method including (a) analyzing the image; (b) creating a model for the output device, based on the analysis, wherein the model encompasses the specific color and is made in a particular space having a one-to-one relation to a device independent color space.~~

—■

ABSTRACT OF THE DISCLOSURE

A method for outputting an image having a specific color on an output device, includes the steps of: analyzing the image for an overlap of the specific color with another color; and creating a model for the output device, based on the analysis, wherein the model encompasses the specific color, uses spectral information of the specific color and is created in a particular space having a one-to-one relation to a device independent color space. --
